PROJECTS

TODO LIST APPLICATION 🔗 LINK

- This project allows us to add, remove, and append completed data to our daily routine program .

- This project helps beginners and intermediate developers understand fundamental front-end development concepts.

CRUD - OPERATIONS

- Django Framework Using We can edit, and remove the information stored in the built-in database MYSQL.

- Defining models to represent your data, using Django's ORM (Object-Relational Mapping) to interact with the database, utilizing HTTP methods like POST , GET , PUT/PATCH , and DELETE to handle data manipulation, and leveraging the Django admin interface for convenient data management.

PROFESSIONAL SUMMARY

Front-End:

Seasoned Front-End Developer proficient in HTML,CSS, JavaScript, leveraging these core technologies to create intuitive and user-centric web interfaces. Proficient in building responsive, user-friendly websites and web applications using modern frontend technologies such as React, Bootstrap. skilled in translating design concepts into interactive and dynamic user interfaces, with a keen eye for design aesthetics and usability. Strong problem solving abilities and commitment to learning new technologies.

Back-End:

Highly motivated and detail-oriented Backend Developer with a strong foundation in server-side programming and database management. Proficient in Python. skilled in database technologies like MySQL, with a solid understanding of backend frameworks like Django. Strong problem-solving abilities and a commitment to writing efficient, scalable, and maintainable code. Eager to contribute to a collaborative team, learn from experienced developers,and further enhance technical skills in backend development.

WEATHER FINDER 🔗 LINK

- We can check the weather in a city or country with this API-based project.

- Developing website that uses a weather API service like OpenWeatherMap to using javascript and fetch real-time weather data for a specified location, allowing users to instantly see current weather conditions.

E-COMMERCE SITE 🔗 LINK

- I developed an eCommerce site using HTML, CSS, JavaScript, and React.js. This project involved creating a responsive and user friendly interface where users can browse services and make purchases.

- It showcases my ability to build dynamic web applications with modern front-end technologies, focusing on creating a smooth and engaging user experience.

CERTIFICATIONS

- I have completed Python Full Stack Course in Greens technology.

- Digital 101 Journey by Future Skills Prime.

- I have completed Beginner's Javascript Bootcamp in Learnz Development Hub.

DECLARATION

I MESIYA A, hereby declare that details and particulars and furnished above are true and correct to the best of my knowledge.
