PROJECTS

AGRICULTURE FARM MANAGEMENT SYSTEM

- Developed a responsive E-commerce website focused on agricultural products, tools, and harvester service bookings.
- Implemented features for browsing and purchasing seeds, equipment, and booking services with cash-on-delivery payment.
- Designed and built an admin dashboard for managing users, orders, deliveries, and product uploads (including image, description, and pricing).
- Utilized PHP for backend logic and MySQL (via PHP MyAdmin) for storing and managing database records.
- Ensured a clean, mobile-responsive UI using Bootstrap and JavaScript for dynamic front-end interactions.

TYSON PHOTOGRAPHY STUDIO

- Developed a responsive multi-page e-commerce web application for an online photography and videography service platform.
- Implemented user-facing features allowing customers to browse services (wedding, pre-wedding, party, vacation, maternity shoots) and submit booking forms.
- Designed and built an admin dashboard to manage user bookings and handle customer inquiries in real-time.
- Integrated frontend and backend using Axios for API calls and Django REST Framework for secure data handling and storage in a MySQL database.
- Configured a contact form using EmailJS to send user inquiries directly to the studio admin's email inbox.
- Utilized Git and GitHub for version control and deployed the frontend on Netlify with a clean, responsive UI built using React.js and Bootstrap.
